Gender: Male

PROFILE

Full-stack developer with strong Python, JavaScript, HTML, and CSS skills, actively building expertise in machine learning and MLOps for FinTech/Crypto applications. Real-world financial trading experience since 2019 combined with systematic technical learning at Code Institute. Proficient in data processing (pandas, NumPy), currently expanding into ML tools (scikit-learn, XGBoost), cloud platforms (Azure), and financial APIs. Seeking to leverage programming skills, financial domain knowledge, and data-driven mindset to build intelligent solutions for financial markets.

KEY SKILLS & TECHNOLOGIES

- Programming & Development: Python (pandas, NumPy, OOP, API integration), JavaScript (ES6+, Chart.js, async), HTML5, CSS3, Git/GitHub workflows, VS Code, Agile/Scrum
- Machine Learning & Data Science (Learning): scikit-learn (regression, classification), XGBoost, CatBoost, feature engineering for time series, SQL/PostgreSQL fundamentals
- FinTech & Trading: Financial APIs (yfinance, Binance API, Alpaca), Trading platforms (TigerTrade, CScalp, ATAS, cTrader), Technical analysis, volume profiling, risk management
- Cloud & DevOps (Learning): Azure Fundamentals (AZ-900 prep), Docker basics, FastAPI fundamentals
- Professional Skills: Problem-solving, data-driven decision making, pattern recognition, adaptability, cross-functional collaboration, systematic learning approach

RELEVANT EXPERIENCE

Full Stack Developer Trainee - Code Institute (Remote)

May 2025 - Present

- Built Personal Finance Survey Analyzer: Python CLI application with Google Sheets integration, data visualization using pandas/NumPy, and successful Heroku deployment
- Developed FinTrack Dashboard: JavaScript personal finance tracker with Chart.js data visualization, T-Bank inspired responsive design, and GitHub Pages deployment
- Created fintech-focused applications including Loan Calculator with payment schedule generation and Thunder QR Generator with enhanced functionality.
- Technical stack: Python (pandas, NumPy, OOP, API integration), JavaScript (ES6+, Chart.js, async), HTML5, CSS3, Git/GitHub workflows

Participant - JiVS Hackathon 2025 (Data Migration International & Infosys) Sanction & Compliance Monitoring Challenge Feb 2025

- Designed a compliance monitoring solution for sanctions data integration and risk assessment.
- Focus on data structuring, user requirements, and adaptability for financial institutions.

Independent Trader & Market Analyst - Zurich

Jun 2019 - Present

- Applied liquidity-based strategies in high-volatility environments.
- Conducted technical and volume analysis to identify patterns.
- Developed strong skills in risk management and data-driven decision making.

EDUCATION

- Code Institute Diploma in Full Stack Software Development In Progress
- Microsoft Azure Fundamentals (AZ-900) In Progress
- Swiss Alpine Center Cardiff Metropolitan University UK Bachelor's in Food & Beverage Management
