Portfolio

KEY SKILLS & TECHNOLOGIES

Core Tech	Python (Django, FastAPI, Flask) · JavaScript (React, ES6+) · SQL / PostgreSQL · HTML5 · CSS3
ML & Data	XGBoost · scikit-learn · SHAP · Keras / Autoencoder · Streamlit · pandas · NumPy · Matplotlib · Seaborn · Jupyter
FinTech Domain	Trading systems · Liquidity & volume analysis · Risk management · Financial APIs (Binance, Alpaca, yfinance) · Pine Script
Tools & DevOps	Git / GitHub · Docker · Heroku · CI/CD · Azure AZ-900 (in progress) · VS Code · Agile/Scrum

KEY PROJECTS

Credit Card Fraud Detection — ML Flagship
2026

Python · XGBoost · SHAP · Keras · Streamlit · Heroku

github.com/SteveDok22/credit-card-fraud-detection | Live: credit-card-fraud-detection-st-4cbb00a4456a.herokuapp.com

- End-to-end ML pipeline following CRISP-DM across 7 Jupyter notebooks — data cleaning, feature engineering, model training and evaluation.
- XGBoost classifier with SHAP explainability for transparent fraud scoring; Autoencoder for unsupervised anomaly detection on imbalanced financial data.
- 7-page interactive Streamlit dashboard for real-time transaction scoring and model interpretation for financial stakeholders.

TradeSim Pro — Full-Stack Trading Simulator
2026

Django 5 · React 18 · PostgreSQL · JWT · Binance API · Alpha Vantage · Heroku

github.com/SteveDok22/TradeSim-Pro | Live: tradesim-pro-stiven-62203fadbb77.herokuapp.com

- Full-stack trading simulator with real-time crypto and forex price feeds via Binance and Alpha Vantage APIs.
- Portfolio tracking, trade execution engine, watchlists, and P&L; analytics with JWT authentication.

PacifiqueTrade Indicator 2.0 — Automated Forex Signals
2026

Python · Pine Script v5 · TradingView · Telegram API

github.com/SteveDok22/PacifiqueTrade-indicator2.0

- Automated Forex signal system for GBP/USD, EUR/USD, USD/JPY with multi-timeframe analysis and institutional liquidity zone detection.
- Python automation with Telegram notifications; full test coverage across 14 modules.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer
May 2025 – June 2026

Code Institute — Diploma Graduate, AI Cores Specialization

- Delivered 5 production projects — fraud detection ML system and real-time trading simulator.
- Applied CRISP-DM, Agile workflows, and CI/CD; all projects deployed to Heroku / PostgreSQL.

Hackathon Participant — Sanctions & Compliance Monitoring
Aug 2025

JiVS · Data Migration International & Infosys

- Designed a compliance monitoring solution for sanctions data integration and risk assessment in financial institutions.

Independent Trader & FinTech Specialist 2019 – Present

Self-Directed · Crypto & Forex Markets, Zürich

- Developed liquidity-based strategies across GBP/USD, EUR/USD, USD/JPY, BTC, ETH — institutional order flow, volume profiling, multi-timeframe market structure.
- Built Pine Script indicators and Python automation with Telegram integration; 14-module test coverage.
- Deep expertise in risk management and financial data — directly informs every FinTech product built.

Culinary Professional — SWISS First Class Lounge Jan 2024 – Present

GateGroup · Zürich Airport

- Operations leadership in premium airline catering; process optimisation, team coordination, quality control.

Station Chef / Chef de Partie — Michelin-Level Restaurants 2014 – 2023

Beluga · Varoulko · Hyatt Regency · CH, FR, GR, RU

- Precision and performance under pressure — skills directly transferable to high-stakes software development.

EDUCATION

BSc (Hons) Computer Science Enrolling 2026

Mediterranean College — UK-validated (University of Derby / Wolverhampton)

Diploma in Full Stack Software Development — AI Cores Specialization Completed 2026

Code Institute (Remote)

Microsoft Azure Fundamentals AZ-900 2026

Certification in progress

Bachelor's in Food & Beverage Management 2013 – 2016

Cardiff Metropolitan University UK / Swiss Alpine Center
